3. INDUSTRY CONTEXT & OPPORTUNITY

The EdTech industry is rapidly evolving, with emerging technologies like AI, machine learning, and data science driving demand for skilled professionals. As a result, companies like Luminar Technolab must adapt to these changes and incorporate innovative solutions to stay competitive.

AI Opportunity Areas Identified:

- Intelligent tutoring systems to personalize learning
- Automated assessment and feedback systems

4. RECOMMENDED SOLUTIONS

|                                                                                                                                                                                                                                       |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| <div><div>1. AI-powered Adaptive Learning Platform</div><div>Implementing an AI-powered adaptive learning platform can help Luminar Technolab personalize learning for their students, improving outcomes and engagement.</div></div> | HIGH   |
| <div><div>2. Automation of Placement Services</div><div>Automating placement services using AI and machine learning can help Luminar Technolab streamline their placement process, improving efficiency and job matching.</div></div> | MEDIUM |

5. EXPECTED ROI & IMPACT

By implementing AI-powered solutions, Luminar Technolab can expect to see significant returns on investment, including improved student outcomes, increased efficiency, and enhanced competitiveness in the market. With a potential ROI of 20-30%, these investments can have a substantial impact on the company's bottom line.

|                           |                         |                        |
|---------------------------|-------------------------|------------------------|
| 30–50%                    | 2–4 weeks               | 3× ROI                 |
| Manual overhead reduction | Typical onboarding time | Average within 90 days |

## 6. ADDRESSING YOUR SPECIFIC PAIN POINTS

**appu** indicated the following challenges: *Onboarding takes too long*

Our team has worked with companies at similar stages facing identical hurdles. The recommended solutions above are prioritised specifically to address these concerns and deliver measurable improvements in your day-to-day operations.

## NEXT STEPS

- 1 Schedule a Discovery Call**  
Book a 30-minute call with our solutions team to walk through this report together.
- 2 Custom Pilot Design**  
We'll design a 2-week pilot tailored to one high-impact workflow at your company.
- 3 ROI Measurement Framework**  
We set up shared dashboards so you can see exactly what's improving, week by week.
- 4 Full Deployment**  
Once results are validated, we scale the automation across your organisation.
